

Dear Secret Service!

We are very glad to see you here in Russia. Russian fans have dreamed of this for a very long time. We can assure you that Secret Service is still loved in our country, both by old fans and by younger listeners who have quite recently discovered this band.

While collecting and generalizing information about the band, we still have several blanks in Secret Service's history. And so we'd be very grateful to you if you could answer a few questions. It won't take much time; and it would be very nice for us to obtain first-hand information.

1. Have you ever been to our country or is it your first visit to Russia?
2. Many fans are wondering why records of Secret Service have not been re-released since a very long time ago. For example, the albums *Ye Si Ca*, *Cutting Corners* and *Jupiter Sign* have never been released on CD. Do you have any plans to re-release the main six albums on CD in the future? And what do you think about the idea of creating a compilation CD with rare non-album tracks and maxi-single mixes?
3. The author of the lyrics on Secret Service's early albums is Björn Håkanson. Who is he? Was it perhaps a pseudonym of Ola Håkansson?
4. According to unofficial Secret Service's discography from the web, the Spanish and Latin American releases have a number of interesting peculiarities. Were there Spanish-language versions of at least some of Secret Service's songs?
5. What are the other members of the original Secret Service line-up (Leif Johansson, Leif Paulsen, Tonny Lindberg) currently up to? Do you keep in touch with them?
6. Question for Tim Norell. What's the reason you never appeared on album covers, TV performances and video clips?
7. What does *Ye Si Ca* mean?
8. What Secret Service's songs are your most favourite?

Thanks!

With the best wishes,
Russian Secret Service fans
